

**Policy Advisory Board Statement re: dotMobi Domain Compliance Policy – March 2006**

mTLD's Domain Compliance Policy describes the proposed conformance policy to be used by mTLD when enforcing the mandatory rules described in the "dotMobi Switch On!™ Guide for Web Development."

Members of the Policy Advisory Board (PAB) reviewed and gathered to discuss the first draft of mTLD's Domain Compliance Policy on 25 January 2006. This Policy was later refined by mTLD in response to comments received.

After reviewing the second draft of mTLD's Domain Compliance Policy and convening to discuss same on 14 March 2006, the members of PAB agreed on the preferred courses of action to be taken in the situations described [ref: meeting minutes]. A central feature of this policy is action to be taken by mTLD in the face of a registrant's non-compliance with the Switch On! Guide for Web Development. PAB members recommended the placing of a domain "on hold" in the root DNS servers.
